

Urethane Rear Trailing Arm Bushings (with new grease trap)

Thank you for purchasing the Rogue Engineering Urethane Rear Trailing Arm Bushings. These bushings and pins are proudly made in the USA.

Installation is straightforward, but an alignment by a qualified professional facility is required.

Parts Included:

- Four (4) urethane trailing arm bushings
- Two (2) aluminum pins

Removal of Stock Bushings

This information can be found online, at Rogue Engineering's website under "Tech Tips".

Installation of Urethane Bushings

1. Once the factory bushings have been removed, install each of the bushings halves into the trailing arm. Using a of anti-seize compound will help. With the new "grease trap", it allows to contain a small amount of lubricant for longevity.
2. Reassemble.
